PVC ZEMİN KAPLAMA / напольное покрытие ПВХ

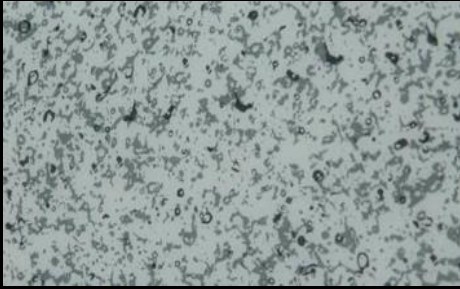

LVT FLOOR COVERINGS

Luxury Vinyl Tile; Compared to other coating options, is a type of coating that stands out with its aesthetic aspect. Also it is known as "LVT" too. It is a plastic based material made from petro chemicals. This Vinyl flooring is produced from natural and synthetic polymer materials. It is an advantageous floor covering that does not slip, antistatic, asbestos-free, non-corrosive, anti-bacterial, non-flammable, heat-insulating, health-friendly, solvent-free, sound-absorbing and does not require polishing.

ROLL PVC FLOOR COVERINGS

кухонное напольное покрытие из ПВХ

PVC FLOOR COVERINGS

PVC (Vinyl) is a kind of non-natural synthetic plastic. It is made of chlorine and ethylene (crude petroleum product). When being used, they are combined to form a Polyvinyl Chloride (PVC) material, commonly referred to as vinyl. Since it is resistant to liquid and similar interactions, it does not swell in any way. Due to its non-flammable material, PVC flooring products are in high demand in the world market.

GRASS CARPET / ковер-трава

GRASS CARPET

A grass mat is a turf which is a substitute for regular grass. It's mostly plastic, but they can be made from real grass, rubber and some other materials as well. A majority of us are already familiar with them since most sporting fields make use of them rather than natural grass since it is cheap and very easy to maintain. They usually have a firm and flexible base where synthetic fibers are attached providing the look as well as the feel of natural grass without the stationary quality and maintenance. It is colorfast, child and animal-friendly, non-flammable and easy-to-clean apart from its natural appearance and quite advantageous.
